Walnut, Ca. 91789,

GGW was founded in 2015, as a DBE / SBE & MBE Technology - COMPUTER VISION & FACIAL MATCHING ANALYTICS Hub company located in Walnut, California. With over 100 years of collective Aerospace, Engineering and Computer Science experience between 4 multi-disciplinary PhD's & P.E's and major partners GENETEC, IBM, AXIS, EyesOnIt & BioID and KEPLER NETWORK. Augmented with a blend of Computer Science & Engineering Interns from major Engineering University (i.e. MIT, CALTECH, STANFORD & CALPOLY). Bringing together capabilities from a broad range of traditional and non-traditional machine learning analytics by using collaborative Computer Vision Object Detection, Biometrics and API Algorithms for designing sustainable innovative AI products.

CORE COMPETENCIES

- 21ST Century Approach to Rail & Transit Systems by addressing urgently needed innovations for improving transit station safety and security. By leveraging the latest advancements in asymmetric analytics and system integrations. For detecting and identifying in real – time imagery such; Unattended Bag/Packages, Loitering, Restricted Area Intrusion (Trespassing), Video Smoke / Flames Detection, Wall Graffiti, and Abnormal sudden crowd clustering.
- Rail & Transit Facial Matching Systems
 - Facial Recognition and liveness biometric detection & pattern comparison technology
- AI (Artificial Intelligence Analytics) and AI Chat
 - Predictive modeling for data trend applications
- Project Management
 - PMI Certified Program Managers
